Fire Brigade Locks & NKS

National Key Scheme and Fire Brigade Locks

The National Key Scheme locks/padlocks can only be operated by using special NKS or Radar keys. Disabled people in possession of such a key will have independent access to public toilets locked by this and similar NKS locks throughout the country. FB Locks and keys are carried by the London Fire Brigade and are used on doors and cupboards leading to access risers, cleaning cupboards, electrical and gas meters and anywhere where emergency access may be required.

Locks
